Toronto, May 2020 – Armstrong Fluid Technology has achieved the prestigious “Management Status” in the 2019 CPD [CPD Climate Change Rating Report](#).

Based on companies acting to address climate risks and build a zero-carbon economy, the [CPD Global Report](#) rates companies worldwide on their current environmental footprint and how they act to improve it. Of the more than 8,400 reporting companies, less than 9% achieve the prestigious “Management Status.”

Armstrong launched its [Planet Proposition](#), sustainability initiative seven years ago and since that time has helped customers save over 440,000 tons of CO2 equivalent, 1.5 billion KWh of electricity and \$135 million dollars.

Armstrong is also a partner in the [Net Zero Carbon Building Commitment](#) to operate its own buildings at net zero by 2030; as well as a member of the [EP 100](#) initiative to lower greenhouse gas emissions and accelerate a clean economy.

CDP is a not-for-profit organization that operates a disclosure system for investors, companies, cities, states and regions to manage their environmental impacts.

About Armstrong Fluid Technology

With over 1200 employees worldwide, operating seven manufacturing facilities on four continents, Armstrong Fluid Technology is known as an innovator in the design, engineering and manufacturing of intelligent fluid flow equipment. With expertise in demand-based control, digitalization, fluid flow, and heat transfer, Armstrong Fluid Technology leads the fluid systems industry, including HVAC, plumbing, and fire safety, providing the most energy-efficient and cost-effective solutions to building professionals and owners around the world.

Armstrong Fluid Technology is committed to sustainability. In 2018, the company launched its 2 by 22 initiative, a program that aims to reduce Greenhouse Gas emissions among customers by 2 million tons by the year 2022. More recently, Armstrong signed the Net Zero Carbon Buildings Commitment, a program launched by the World Green Building Council. As a signatory to the program, Armstrong has pledged to ensure that all its offices and manufacturing facilities will operate at net-zero carbon by the year 2030.
